Detail-oriented Product Designer with experience in building scalable UI patterns and design systems. Practical front-end background (Next.js, React, Tailwind CSS) ensuring clean, accurate design specs and smooth handoff to engineering. Passionate about building web and application products; building open source tools that help improve DX; a11y (accessibility - WCAG 2.2 AA compliance).

EXPERIENCE

UI/UX & Motion Designer | SAN Data Systems Inc.

Dec 2025 - Jul 2026

Built a scalable UI design system and component library from scratch; reported directly to the CTO in an async, English-speaking environment. Redesigned the core product interface in Figma to improve overall UX, accessibility and ensure visual consistency across existing platforms.

Structured Figma files to ensure clean design specs for seamless motion integration and direct engineering handoff.

UI/UX Designer | FINA Care Studio

Apr 2026 - Jun 2026

Designed and deployed a live, CMS-integrated, fully responsive website using Figma Sites. Leveraged real-time editing and AI tools to accelerate the design-to-live process while maintaining a luxury brand aesthetic.

Engineered a scalable component library to maintain brand consistency, supporting the digital marketing launch for the company's international expansion into Vietnam.

UI/UX Designer | Virtue Recovery Center (AZ)

Dec 2025 - Jan 2026

Designed a targeted, high-fidelity landing page for a US-based healthcare facility through a **direct B2B referral** from SAN Data Systems' CTO.

Designed clear CTA layouts with reassuring microcopy to comfort potential users and build a trustworthy experience.

Product Designer | Siglo

Mar 2025 - Oct 2025

Owned the end-to-end design process for a community messaging app **over 130 days**. Conducted market research, user analytics, competitor analysis, branding, design systems, sitemaps, user flows and user testing to build the project from scratch.

Analyzed **100+ survey responses** during initial research to build wireframes, designed and prototyped **550+ high-fidelity screens** while producing over 10 minutes of **prototype demo videos** for **2 dedicated user flows** (creators and viewers), ensuring a seamless experience for diverse audience groups.

Defended UX decisions and design concepts across **4 milestone** presentations to stakeholders.

UI/UX Designer | Nalee Viet Nam JSC

Feb 2025 - Oct 2025

Designed a responsive, SEO-optimized e-commerce platform. Built a reusable design system and color variables based on brand characteristics; sourced media assets to ensure the showcase reflected reality as closely as possible.

Partnered directly with stakeholders to deliver end-to-end digital solutions from concept to final engineering handoff.

EDUCATION

Bachelor of Arts in Digital Art & Design

FPT University HCMC | Sep 2021 - Nov 2025 (8.05/10 GPA)

Department: Software Engineering.

Concentration: Multimedia Communication Design (UI/UX Focus).

30% Merit-Based Entrance Scholarship (Awarded for the entire 9-semester program).

AWARDS

Second Runner-Up | ECO interCHANGE

Thu Duc City Technology Train Carriage Design Competition | Sep 2024

Organizer: Ho Chi Minh Communist Youth Union of Thu Duc City.

Finished in 3rd place in a city-level train carriage design competition, served as the lead 3D and Motion Designer alongside 04 team members. **Top 3 designs will be physically implemented on an actual train carriage by the Ho Chi Minh Communist Youth Union of Thu Duc City.**

Recognition - Service Learning | Phong Vi Banh Xua

Experiential Entrepreneurship - EXE201 | Nov 2024

Organizer: FPT University.

Honored as one of the few standout projects among over **50 competing startup teams**. Served as Web Designer and Front-end Developer, built the marketing and sales website for a pastry startup project; collaborated with 06 other team members. **Successfully generated over 120 orders and achieved profitability within the first month of launch.**
